## 2734 - Coco-Bits and Maths

Description

The Coco-Bits are preparing for the Math Olympics. They have a training software. The software's input starts with the number 0 and, afterwards, operations of addition and subtraction to be performed on it. Such operations are described as follows: "suma N" or "resta N" where N is the amount to add or subtract.

The Coco-Bits want you to write a program to check their answers.

Input specification

A set of operations of the form "suma N" or "resta N" where N is an integer.

Output specification

The word "resultado: " and then the number that results of the operations.

Sample input

```
suma 10
suma 5
resta 3
```

Sample output

```
resultado: 12
```
